

Polydur® Laminating System

PRODUCT

Polydur® is a unique tooling system that provides fast and accurate laminates for all industries, including tooling, automotive, aerospace, composites, art, theatre and film sets.

- Low cost laminates and tooling from clay, wood & resin
- Faster & easier to use than conventional resins
- Accurate with no shrinkage
- High temperature resistance
- Fire retardant
- Usable in 5 hours
- Very low hazard - all equipment can be cleaned using water

Over the past 100 years John Burn has continued to develop its expertise in all areas of design innovation and manufacturing processes. We are proud of our reputation as an efficient, reliable and customer friendly company.

Our dedicated approach to providing excellent customer service and a top quality product range has helped us build strong relationships with our customers over the years, many of whom now consider John Burn as a significant business partner.

Working closely with our customers, by providing comprehensive technical support, we aim to help them find effective solutions to their many diverse project and material requirements.
