

Size really does matter!

It's now even easier to use the best quality model & tooling boards on the market. A selection of our range is now available in a more convenient size.

- High Quality SikaBlock® and JBB boards now available in 495mm x 495mm x 25mm, 50mm, 75mm or 100mm
- Ideal for all projects - with a larger choice of affordable boards
- The following grades of board are available in the new size: M300, M450, M650, M700, M940, M960 & JBB678
- Reduced material cost & less wastage
- Next day delivery
- Reduced size means you can now upgrade to a higher quality board for less
- Lighter weight boards are easy to process

The UK's largest distributor of advanced prototyping, tooling and composite materials

In partnership with SIKA, one of the most recognised global leaders in the manufacture of specialty chemicals, we offer our customers unrivalled access to the most forward thinking processes and materials to help provide a solution for the most challenging projects.

Together with our customers we strive to change the way the products of the future are designed and manufactured to become the products of today.

We offer next day delivery and a comprehensive customer support network, which includes a highly successful team of Customer Service Specialists and Technical Support Team to provide you with help and guidance. Our support team have a flexible approach, an eye for detail and a wealth of technical knowledge.
