

**Reduce costs  
with Sika.**

## **Clever calculators work with SikaBlock<sup>®</sup> M940.**

Excellent suited for foundry patterns and match plates, core boxes, master models for high quality demands and also diverse moulds and tools.

■ **Top processing:**

- Fast milling without surface defects
- Very good chip formation
- Good dimensional stability
- Top surface aspect

■ **Excellent application properties:**

- High abrasion resistance
- Very high swelling resistance
- Low coefficient of thermal expansion
- Very impact resistant and high edge stability

■ **Best price/performance ratio:**

- Low total costs thanks to high quality and attractive price
