

# Are you in pole position?

**Next day delivery of the Trelleborg epoxy board range. If you're serious about high quality composites, master models, pre-preg moulds or materials for production parts we have it all.**

## Trelleborg Epoxy Boards

The range includes the following boards:

- TB400 - 0.4 density board / HDT 120° C
- TB610 - 0.623 density / HDT 158° C
- TB620 - 0.62 density / HDT 110° C
- TB650 - 0.68 density / HDT 110° C
- EP678 - 0.7 density / HDT 119° C

All boards have a superior surface quality with excellent milling characteristics. With a low co-efficient of thermal expansion the boards have excellent dimensional stability making them ideal for pre-preg mould construction for the manufacture of composite parts.

The range also include a comprehensive range of epoxy adhesives, board sealers and primers.
